Chemical analysis of bleaching earths

Client: Ashapura Volclay Ltd.

No. of project: ASH 10002 K

Date of Delivery: 2010-04-12

Analysis of **Polychlorinated Dibenzo-p-Dioxins and Dibenzofurans (PCDD/F)**
Heavy Metals (Pb. Cd. Hg)
Polycyclic Aromatic Hydrocarbons (PAH). Benzo-a-pyrene (BaP)

method of analysis: according to Fediol's Code of Practise on the Purchase Conditions of Fresh Bleaching Earth for Oil Refining

appraisal of results

The sample „AVL/BE/002: Galleon V2 Super“ (Lab. No. 154103) fulfills the criteria of Fediol's „Code of Practise on the Purchase Conditions of Fresh Bleaching Earth for Oil Refining“ of 2008.

The contents of PCDD/F (dioxins), WHO-PCB's, Heavy Metals (Pb. Cd. Hg) and benzo(a)pyrene are below the maximum levels.

Würselen, 28-04-2010
